

# Portable small mobile power price

#### **Overview**

How much does a Portable Power Station cost?

A typical price for a Portable Power Station is \$1,392 but can range from approximately \$59 to \$9,429. These Portable Power Stations are the most popular among Lowe's entire selection. How much does a portable power station cost?

A typical price for a Portable Power Station is \$1,392 but can range from approximately \$59 to \$9,429. These Portable Power Stations are the most popular among Lowe's entire selection. While these are popular, we recommend ensuring that the Portable Power Stations you consider have the right mix of features and value.

Where can I buy a portable power station?

When customers buy Portable Power Stations, they often buy or consider: Find portable power stations at Lowe's today. Shop portable power stations and a variety of electrical products online at Lowes.com.

Can a portable power station charge a phone?

Some can only charge phones, and others can power your entire house. Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip.

What is the best portable power station?

It even has enough power and capacity in the tank to charge electric vehicles. If there were such a thing as a perfect portable power station for all needs, this would be it. The Anker SOLIX F3800 Plus is the portable battery system that does it all.

How long does a portable power station last?

It depends on how often you use your power station and the type of battery inside. Like any battery, for example one in a phone or laptop, this will wear down over time until the power station no longer holds charge. General estimates put the lifespan of a portable power station at around ten years.

Should you buy a budget portable power station?

The trade-off for getting a budget portable power station comes from the lower battery capacity, which sits at just 256Wh. So, you won't be able to power most household appliances or anything like that, but it's more than enough to keep smaller devices like your phone and laptop on charge.
