

# Price of lithium-ion batteries for energy storage

### **Overview**

How much does a lithium ion battery cost?

The average price of lithium-ion battery packs is \$152/kWh, reflecting a 7% increase since 2021. Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs.

What are battery cost projections for 4 hour lithium-ion systems?

Battery cost projections for 4-hour lithium-ion systems, with values normalized relative to 2022. The high, mid, and low cost projections developed in this work are shown as bolded lines. Figure ES-2.

How much does commercial battery storage cost?

For large containerized systems (e.g., 100 kWh or more), the cost can drop to \$180 - \$300 per kWh. A standard 100 kWh system can cost between \$25,000 and \$50,000, depending on the components and complexity. What are the costs of commercial battery storage?

.

What is a lithium ion battery?

A quick refresher A lithium-ion (Li-ion) cell is a type of rechargeable battery cell known for its high energy density, lightweight design, and rechargeability. These cells power a wide array of modern devices, from smartphones and laptops to electric vehicles (EVs) and solar power systems.

How much does a battery cost?

Electric Vehicles (EVs): Most costly due to high kWh requirements. A Tesla battery pack (100 kWh) may cost around \$8,000-\$10,000 just in cells. Consumer Electronics: Prices vary from \$1 to \$5 per cell, depending on form

factor and performance. Solar & Backup Storage: Typically uses LFP cells at around \$80/kWh.

Why are lithium-ion batteries so expensive in 2025?

In 2025, lithium-ion battery pack prices averaged \$152/kWh, reflecting ongoing challenges, including rising raw material costs and geopolitical tensions, particularly due to Russia's war in Ukraine. These factors have led to high prices for essential metals like lithium and nickel, impacting the production of energy storage technologies.
