Overview

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

What is a mobile energy storage system?

Mobile energy storage systems (MESSs) can be self-mobile electric vehicles (vans, buses, or light-duty vehicles) or towable (semi-trailer trucks). During restoration purposes, MESS should be dispatched to the desired location (non-black start generator units locations).

How much does mobile storage cost?

The rental fees for a mobile storage unit range from \$200 to \$600 per month for businesses. The cost for delivery is \$100 to \$500, regardless of the size of the unit. Sometimes, the rate for a personal unit goes up to \$300.

What are the benefits of battery energy storage systems (BESS)?

Tariff Relief. Up to 10% Protection. Battery Energy Storage Systems (BESS) has gained market share due to its cost-effectiveness and safety compared to diesel generators.
