

Purchase distributed photovoltaic inverters

Overview

What is the global demand for PV inverters in 2022?

The global PV demand of 201 gigawatt alternating current (GWac) in 2022 contributed to 48% growth year-over-year for PV inverters. In terms of inverter shipments, strong growth in Europe, Asia Pacific, and the United States where government support bolstered to meet clean energy goals led to a total of 333 GWac of global shipments in 2022.

Which PV inverter vendors shipments grew the most in 2022?

The top five vendors – Huawei, Sungrow, Ginlong Solis, Growatt, and GoodWe – shipped more than 200 GWac and accounted for 71% of total global PV inverter shipments in 2022, growing 8% from 2021. Huawei's shipments saw a significant increase of 83% in 2022 compared to 2021, while Sungrow's shipments expanded 56% in the same period.

Why should you buy a solar inverter?

Prioritizing safety and reliability, these inverters deliver exceptional performance with advanced technology and smart energy management, guiding you toward a cleaner, smarter renewable energy future. Built with a focus on safety and reassurance, this solar inverter provides seamless operation and intelligent energy management.

How does the performance of a solar inverter affect power generation?

As the core equipment in a solar PV system, the performance of a solar inverter directly affects the overall power generation efficiency and power quality of the system. Choosing the right inverter type, power and performance index is crucial to ensure the normal operation of the system and efficient power generation.

Which solar inverter is best?

In general, string inverters are suitable for most homes, while microinverters

are suitable for homes with uneven lighting or higher requirements for system monitoring. How important is the efficiency of a solar inverter?

The efficiency of the inverter directly affects the power generation capacity of the solar system.

How much does a hybrid inverter cost?

Below are some common hybrid inverter price ranges: Small and medium power hybrid inverters (3KW-10KW): the price range is around hundreds to thousands of dollars. These inverters are suitable for scenarios such as homes, small commercial premises or distributed PV systems.
