

Romania Energy Storage Project Quality Assurance

Overview

Will Romania support the construction of electricity storage facilities?

Following the positive assessment of the Romanian Recovery and Resilience Plan, the Commission has approved a ≤ 103 million Romanian scheme to support the construction of electricity storage facilities.

What is a battery energy storage scheme in Romania?

The aim of the scheme is to support investments in battery electricity storage facilities, allowing for a smooth integration of renewable energy coming from wind and solar sources in the Romanian power system. Under the scheme, the aid will take form of a direct grant to projects selected through a competitive bidding process.

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

Is Romania targeting 3 GWh?

Romania's energy minister said the country is targeting 3 GWh over the next few years. The BESS market in Romania is heating up, say local analysts and insiders.

Is the Bess market heating up in Romania?

The BESS market in Romania is heating up, say local analysts and insiders. Irene Mihai, policy officer at the Romanian Photovoltaic Industry Association (RPIA) recently told pv magazine that a realistic target for the utility-scale BESS segment in Romania "would be around 2 GWh (around 1 GW of installed capacity)" for 2030.

Romania Energy Storage Project Quality Assurance

Energy Storage in the European Union and Romania

Energy storage can play a key role in narrowing the gap between the extreme values of energy prices and balancing the high and low levels of demand and supply.
