

# Romania Shelter Battery Energy Storage Power Station

### **Overview**

The plant to be built in Floresti, Cluj County, will have a capacity of 200 megawatt (MW) / 400 megawatt-hour (MWh), and it will double the current total energy storage capacity of the country. The new battery energy storage system (BESS) is expected to become operational by the end of 2025. What is Enery doing in Romania?

This week, Vienna-based Enery has commissioned a major solar and storage site in northwestern Romania. The project consists of a 51.4 MW PV plant and and a battery energy storage facility of 22 MWh.

Does Romania have a battery energy storage plan?

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

Does Romania have a grant program for battery energy storage systems?

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities – wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million).

Does Romania offer a subsidy for battery energy storage systems?

From ESS News Romania has launched a new subsidy scheme for behind-themeter battery energy storage systems to the tune of €150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday. Bids will be accepted until January 17, 2025.

What is Romania's most important energy project?

Earlier this month, Burduja reported progress on what he terms as "the most important project for the Romanian energy system" – the 1 GW Tarniţa-Lăpuşteşti pumped storage hydropower plant. Romania resumed the development of the project last year, upping the planned capacity from 500 MW to 1 GW.

How will Romania grow its energy storage fleet?

Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2032.
