

# San Marino Liquid Cooling Energy Storage Container Quote

#### **Overview**

What is ENERC liquid cooled energy storage battery containerized energy storage system?

EnerC liquid-cooled energy storage battery containerized energy storage system is an integrated high energy density system, which is in consisting of battery rack system, battery management system (BMS), fire suppression system (FSS), thermal management system (TMS) and auxiliary distribution system.

How many battery cells are in a ENERC liquid cooled container?

The battery system is composed of 10 battery racks in parallel. Each battery rack contains 8 battery modules by series connection, each battery module is composed of 52 battery cells in series connection also, so each rack contains 416 battery cells. Totally, EnerC liquid-cooled container's configuration is 10P416S.

What is ENERC liquid cooled container?

Totally, EnerC liquid-cooled container's configuration is 10P416S. Total 52 pieces lithium iron cells (280Ah/3.2V) in series connection are used for every battery module. For safety protection, an internal high speed DC fuse is included, and removable MSD switch can cut off the high voltage connection during transportation process.

### San Marino Liquid Cooling Energy Storage Container Quote

# Liquid Cooling BESS Container, 5MWH Container Energy Storage ...

From ensuring stable power supply for industrial parks to optimizing energy storage for renewable energy systems, this system can be customized to suit a wide range of applications.
