

Sao Tome and Principe uses base station communication

Overview

Does so Tomé & Príncipe use satellite?

São Tomé and Príncipe relied on satellite for international Internet connectivity until the arrival of the ACE undersea fibre-optic cable in 2012. STP Cable was established as a public-private partnership to manage the country's holdings in ACE with the goal of open access and cost-based wholesale costs.

What are Sao Tome and Principe?

Sao Tome and Principe is a country composed of two islands, Sao Tome and Príncipe. It is exactly off the coast of central Africa. Geographically, both islands are the remnant part of an extinct volcanic mountain range. In terms of population, it is the second-smallest country on the African continent.

Does so Tomé & Príncipe have a microwave link?

A high-capacity microwave connection was deployed between the islands of São Tomé and Príncipe in 2015. The transmission link covers 176 km, one of the longest microwave routes in the world, and provides 300 Mbit/s of capacity, more than nine times the previous link.
