

Saudi Arabia lithium iron phosphate outdoor power cabinet

Overview

Is Saudi Arabia developing a large-scale battery storage project?

The project is among several large-scale battery storage initiatives being developed in Saudi Arabia. In an ongoing procurement, the Saudi Power Procurement Company (SPPC) is tendering four 500 MW / 2,000 MWh BESS projects.

Why is Saudi Arabia investing in lithium?

This surge in energy storage capacity is complemented by Saudi Arabia's strategic investments in the lithium supply chain, a critical component for battery production. Saudi Aramco, in partnership with state-owned mining company Ma'aden, plans to commence commercial lithium production by 2027.

How many GWh of energy storage will Saudi Arabia have by 2025?

Projections indicate that Saudi Arabia aims to operate 8 GWh of energy storage projects by 2025 and 22 GWh by 2026, positioning the nation as the third-largest global market for energy storage, following China and the United States.

Why is energy storage important in Saudi Arabia?

Energy storage is a vital component of this transition, providing grid flexibility and enabling the integration of intermittent power sources such as solar and wind. The project is among several large-scale battery storage initiatives being developed in Saudi Arabia.

Who are Saudi power procurement Company (SPPC) bidders?

In an ongoing procurement, the Saudi Power Procurement Company (SPPC) is tendering four 500 MW / 2,000 MWh BESS projects. The list of prequalified 33 bidders was released earlier in January, revealing Masdar, ACWA Power, EDF, and TotalEnergies as competitors for 15-year storage services agreements.

Will hithium build a Bess factory in Saudi Arabia?

In addition to the product unveiling, Hithium also announced the formation of a new joint venture (JV), through which it plans the construction of a BESS factory in Saudi Arabia with 5GWh annual production capacity.
