

# Serbia s power station generates electricity

#### **Overview**

The two largest power plants in Serbia, the hydroelectric power plant HPP Derdap I at the Danube river and the coal power plant TENT, went into operation in 1970.

in is dominated by , despite the public preference for .In 2021 Serbia's total was almost 700 , with the energy mix comprising coal.

(NIS) is the only company in Serbia which deals with exploration and production of crude oil and gas, as well as with production of geothermal energy.

On 6 October 1893, the first Serbian power plant, located in the urban neighborhood of Belgrade, began production of electricity. In 1900, the first.

The main producer of electricity in Serbia is . The company has an installed capacity of 7,662 and generates 38.9 of per year. Its installed capacity in is 4,390 MW, gas-fired and liquid fuel-fired .

Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable supply, respectively.

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27% percent from hydropower, with approximately 4% coming from private developers in wind and solar energy.
