

# Seychelles Enterprise Photovoltaic Energy Storage System

#### **Overview**

Where are the solar power plants located in the Seychelles?

The facilities include the 5MW solar PV plant located in Ile de Romainville, a 3.3 MWh energy storage system located on Mahé and a 33kV system that allows for the safe and stable supply of electricity from the PV power plant to the main island of Mahé. This system helps increase the resilience of the national grid of the Seychelles.

Does Seychelles have a 5MW solar PV plant?

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage.

Will PV affect the small power system in Seychelles?

If Photovoltaic (PV) systems grow on the power system in Seychelles, issues such as the impact on system frequency due to PV output fluctuations are expected. There are concerns that it may prevent Seychelles from achieving its ultimate renewable energy goal of "15% renewable energy deployment rate by 2030.

How much energy will the Seychelles save a year?

This system helps increase the resilience of the national grid of the Seychelles. It is estimated that the project will save approximately 2 million liters of fuel annually and offset 6,000 tonnes of carbon dioxide. Have you read?

.

Does Seychelles use fossil fuels?

Seychelles relies heavily on fossil fuels to meet its electricity demand, with

fossil fuels accounting for around 20% of the country's imports. The country has set a target of 5% renewables by 2020 and 15 percent by 2030.
