

Sierra Leone Hybrid Energy Storage Power Station

Overview

Baomahun Hybrid Power Station, is a hybrid power plant under development in Sierra Leone. The power station comprises: (a) a 23.8 MW (31,900 hp) solar power plant (b) a 13 MW/13.8 MWh battery storage power station (BESS) and (c) a 21 MW thermal power plant. The power station is owned and under.

The power station would be located on the premises of Baomahun Gold Mine, located on 124.27 square kilometres (47.98 sq mi) of real estate, just north of the town of Baomahun, Sierra Leone. Baomahun is located in .

The gold mine and the hybrid power station are expected to commence construction in 2024 and reach commercial commissioning in 2025. All the construction costs for.

FG Gold Limited is constructing a gold mine near Baomahun, Sierra Leone. The mine is expected to yield 147,000 ounces per year, peaking at 234,000 ounces, over a 12.5-year mine life. The mine is expected to produce 5.81 million ounces over its lifespan. It.

Baomahun Hybrid Power Station, is a hybrid power plant under development in Sierra Leone. The power station comprises: (a) a 23.8 MW (31,900 hp) solar power plant (b) a 13 MW/13.8 MWh battery storage power station (BESS) and (c) a 21 MW thermal power plant.
