

Slovenia energy storage new energy storage equipment

Overview

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan. How much energy does Slovenia need?

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

How many hydropower plants will Slovenia have by 2045?

Another pumped storage hydropower plant is seen by 2045. It would be able to generate 180 MW and store 2.6 GWh. The Integrated National Energy and Climate Plan envisages an overall 500 MW in gas power plants in Slovenia by the end of the decade.

Will Slovenia build a second nuclear power plant?

Slovenia aims to decide by 2028 whether it will build its second nuclear power plant. The government is targeting a 55.4% share of renewables in electricity, 45.2% in heating and cooling and 25.8% in transportation, according to the updated NECP for 2030.

How many MW will a pumped Energy Storage Plant have?

The rest of energy storage includes battery energy storage systems (BESS) of 400 MW in total capability. As for pumped storage hydropower plants, the plan is to add 440 MW by 2030 in both advanced scenarios. One is based on acceleration in renewables and the other on more nuclear energy. The capacity matches the Kozjak project.
