

Small household energy storage box

Overview

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.

How many energy storage units can be connected together?

Stackable and lightweight, installers can effortlessly connect up to four units together for additional energy storage. Available in three sizes including 9 kWh, 13.5 kWh, and 18 kWh to meet an installation company's growing customer energy demands. Operating modes: back-up mode, self-use mode, time-of-use mode and custom modes.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.

What is a Smartbox & how does it work?

SmartBox controls the connection to the grid and provides a seamless transition to backup power during power outages. SmartBox also provides control of up to six loads to optimize your energy consumption and prolong battery life. Panasonic EVERVOLT Hybrid Inverter: Converts DC power from solar panels to AC power to energize home loads.

Why should you buy a LiFePO4 battery box?

Highest-level safety based on testing for the system. ☐Built-In Smart BMS☐Our

LiFePO4 battery box come with BMS (Battery Management System) to protect it from overcharge, over-discharge, over-current, and short circuits with an excellent self-discharge rate.
