

Solar Panel Awning

Overview

What is a solar awning?

Solar awnings offer a combination of practical use and green energy, transforming buildings into power-generating hubs while enhancing architectural appeal. Lumos specializes in designing solar awnings that fit into structures, providing energy efficiency, shade, and style all in one package.

How are solar canopies & awnings changing how we use solar energy?

Solar canopies, awnings, and walkways are changing how we use solar energy. If you want a simple setup or a custom design, Lumos offers smart, flexible, and efficient solutions. Lumos solar canopies, awnings, and walkways use bifacial panels that collect sunlight from both the front and back.

Are solar awnings wind tolerant?

Built using traditional solar materials, these glass-based solar panels are very shade tolerant and designed to last for years. Learn More The awning has an innovative design that allows wind to pass through gaps between the panels when the awning is retracted slightly, which enables impressive stability in windy conditions.

What are Lumos solar awnings?

Lumos solar awnings feature customizable designs that focus on architectural needs and energy performance — ideal for commercial facades or home patios. By extending outward from existing structures, our awnings create shaded spaces that reduce heat, improve comfort, and lower cooling costs.

Are Xpanse solar awnings any good?

It's so much more innovative and better made than anything else in the RV industry." The Xpanse™ solar awning features rigid and robust solar panels that are designed for performance and durability. Built using traditional solar materials, these glass-based solar panels are very shade tolerant and

designed to last for years.

Why should you choose a solar-powered awning?

Embrace substantial energy savings on multiple fronts. Not only does the solar-powered system minimize your reliance on traditional power sources, but the very presence of the awning itself delivers cooling comfort. Enjoy a sheltered oasis, shielded from the sun's harsh rays, reducing temperatures by up to 20 degrees.
