

Solar power system prices in the Philippines

Overview

As of recent data, solar panel prices in the Philippines typically range from PHP 30,000 to PHP 60,000 per kilowatt (kW). This cost includes panels, inverters, and installation. Prices vary based on panel type, system size, and installation complexity. How much do solar panels cost in the Philippines?

Prices can fluctuate based on these trends. For example, the recent decrease in the cost of solar panel production has contributed to lower consumer prices. As of recent data, solar panel prices in the Philippines typically range from PHP 30,000 to PHP 60,000 per kilowatt (kW). This cost includes panels, inverters, and installation.

Which solar panels are best for residential installations in the Philippines?

That said, monocrystalline solar panels are currently the most frequently selected for residential solar installations because they are space-efficient and have the highest efficiency. In terms of panel brands, most solar installers in the Philippines will recommend ones made by “Tier 1” solar panel manufacturers.

How long do solar panels last in the Philippines?

Most solar panels have a lifespan of 20 to 30 years, with warranties often covering 25 years. What is the average cost of a solar panel installation in the Philippines?

The average cost varies, but installations generally range from PHP 160,000 to PHP 900,000, depending on system size and type.

How much does solar system maintenance cost in the Philippines?

This would mean that if your panels require replacing within the product warranty period, you might still need to pay maintenance fees. Solar system maintenance charges per visit in the Philippines vary depending on system size — the average price is around ₱2,500.

How much solar energy does the Philippines generate?

According to a report by European renewable energy advocacy group Ember Climate, solar comprised only 1.7% of the total energy generated in the Philippines in the first half of 2022, but it accounted for around US\$78 million or ₱4.4 billion in savings for fossil fuel costs.

Are solar panels a good investment in the Philippines?

Absolutely. With the right system, our clients experience 30% to 70% savings on their electricity bills — some even reach a zero bill. Payback period for a solar system in the Philippines is typically between 3 to 5 years. After that, the savings go straight to your pocket.
