

Solomon Islands New Energy Battery Site Energy

Overview

HONIARA, SOLOMON ISLANDS (12 September 2024) – The Asian Development Bank (ADB) and the Government of Solomon Islands are joining other partners to help Solomon Islands transition to renewable energy with a transformational project that will accelerate renewable energy generation and battery storage system installation, support power sector reforms, and promote private sector participation in the renewable energy generation. What type of power does Solomon Islands have?

With a generation capacity of 34 megawatt (MW), Solomon Islands Electricity Authority, trading as Solomon Power, is responsible for generation, transmission, and distribution throughout the country. All grid-connected power in the country is diesel-generated, and the share of renewable energy in the generation mix is about 3%.

What is a solar hybrid project in Solomon Islands?

The project will finance new solar farms in Guadalcanal and Malaita province, along with a utility-scale grid-connected energy storage system in Honiara. Nearly all of Solomon Islands' grid power is diesel generated. Solar hybrid project 2017 at Taro. Image credit Solomon Power.

What is the power generation capacity of Solomon Islands?

The power generating capacity of the Solomon Islands is currently 10.2 MW, which is equal to its peak load capacity. One mining company in the Solomon Islands generates its own electricity with a power capacity of 11 MW and a peak load of 8 – 9 MW.

How does Solomon power reduce fuel dependency?

To reduce fuel dependency, the government is prioritizing investments in renewable energy for generation. Several renewable energy projects are under development by Solomon Power, including new small solar-diesel hybrid grids and modernization of hydropower plants. Project Data Sheets (PDS) contain summary information on the project or program.

How to reduce energy consumption in Solomon Islands?

Air conditioning in government offices and business houses is a significant contributor to energy consumption in Solomon Islands. Proper maintenance and the introduction of more efficient air conditioners with controls that allow the system to shut down when not needed are ways to reduce energy consumption in this area.

What is the main source of electricity in Solomon Islands?

In Solomon Islands, electricity is primarily generated through the combustion of fossil fuels. The demand for power in Honiara, the capital, has been increasing rapidly since 1996, but the power plants have not been able to keep up with the demand.
