

Solomon Islands energy storage and photovoltaic integration

Overview

The Solomon Islands Renewable Energy Development Project will finance two photovoltaic (PV) parks and a utility-scale grid-connected energy storage system in the Solomon Islands. The Asian Development Bank, the Saudi Fund for Development and Solomon Power are financing the project. How much will a solar PV project cost in Solomon Islands?

Component 3: US\$ 2.5 million is allocated to add grid-connected solar power to contribute to the overall share of renewable energy in Solomon Islands' energy mix.

How will solar power benefit the Solomon Islands?

By increasing the generation capacity of renewable energy facilities, solar power will provide access to electricity for low-income households in periurban and rural areas of the Solomon Islands.

What percentage of the Solomon Islands' electricity mix is renewable?

Renewable energy only makes up 2% of the Solomon Islands' electricity mix. Image: Namkoo Solar. A group of investment firms led by the Asian Development Bank (ADB) has partnered with the government of the Solomon Islands to finance new solar PV power plants, increase rooftop solar PV installations and support the islands' power sector reforms.

Does Solomon have a solar system?

Solomon has natural conditions suitable for solar power, and they are promoting renewable energy, but the grid-connected photovoltaic power generation system (hereinafter referred to as "grid-connected PV system") has not been introduced.

Why is the power supply in the Solomon Islands so volatile?

Currently, most of the power in the Solomon Islands is dependent on diesel generated power which uses imported fuel. This volatile energy supply

structure is susceptible to soaring fuel prices, and the people want it to be rectified as soon as possible.

Can photovoltaics be used for rural electrification in the Solomon Islands?

The success of the Sukiki project in the Solomon Islands, where photovoltaics are used for rural electrification, has brought delight to the government and people. They hope that continued use of photovoltaics for rural electrification will serve as a beacon of hope, not just for the Solomons but for the rest of the world as well.
