

Spanish emergency power supply energy storage battery

Overview

Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

How much energy storage capacity does Spain have?

When it comes to installed energy storage capacity in general, Spain is one of the leading countries within Europe (see figure 2). Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country.

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

Where in Spain can we install 25 MW power batteries?

At Iberdrola España, we have received aid, thanks to the PERTE programme, for the installation of 25 MW power batteries in six projects throughout Spain: Revilla Vallejera (Burgos), Almaraz (Cáceres), Almaraz II (Cáceres), Olmedilla (Cuenca), Romeral (Cuenca) and Andévalo (Huelva).

How does Spain's pumped hydro energy storage compete with Bess?

Spain's pumped hydro energy storage competes directly against BESS, limiting the battery storage opportunity in wholesale markets. 3. Missing

ancillary markets Unlike Great Britain or Texas, Spain never created ancillary service markets that net-zero systems need:.

What is Spain's regulatory framework for energy storage?

Spain's regulatory framework for BESS is set in its Strategy for Energy Storage. The Strategy identifies the required regulatory measures – such as grid access, market structure, and addressing double tolling – that are currently needed to ensure the deployment of a solid energy storage market.

Spanish emergency power supply energy storage battery

HANDBOOK FOR ENERGY STORAGE SYSTEMS

ABOUT THE ENERGY MARKET AUTHORITY The Energy Market Authority ("EMA") is a statutory board under the Ministry of Trade and Industry. Our main goals are to ensure a ...
