

Sudan Electric Energy Storage Power Station

Overview

The Juba Solar Power Station is a proposed 20 MW (27,000 hp) in . The solar farm is under development by a consortium comprising of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based in the UAE. The solar farm will have an attached rated at 35MWh. The off-taker is the South Sudanese Ministry of Electricity, Da.

Does South Sudan have a solar power project?

South Sudan has taken a significant step toward renewable energy with the launch of its first major solar power project. The Ezra Group, a leading business conglomerate, has successfully developed and financed a 20-megawatt (MW) solar power plant along with a 14-megawatt-hour (MWh) Battery Energy Storage System (BESS).

How much does a power station cost in South Sudan?

This power station is an attempt to (a) diversify the country's generation mix (b) increase the country's generation capacity and (c) increase the number of South Sudan's homes, businesses and industries connected to the national grid. The power station is reported to cost an estimated US\$45 million to construct.

Will South Sudan build electricity distribution networks?

South Sudan is building electricity distribution networks in the mentioned three cities. The administration of each project will be handed over to the South Sudanese side upon completion. The projects are still under implementation.

How much electricity does South Sudan have?

In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing.

What is energy in Sudan?

Energy in Sudan describes energy and electricity production, consumption and imports in Sudan. The chief sources of energy in 2010 were wood and charcoal, hydroelectric power, and oil. Sudan is a net energy exporter. Primary energy use in Sudan was 179 TWh and 4 TWh per million persons in 2008.
