

Swedish rooftop photovoltaic panels BESS

Overview

How many large-scale battery storage systems are there in Sweden?

14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region. Developer and optimizer Ingrid Capacity and energy storage owner-operator BW ESS have been working in partnership to deliver 14 large-scale BESS projects throughout Sweden's grid, situated in electricity price areas SE3 and SE4.

Will Rabbalshede Kraft add a solar PV power plant?

Rabbalshede Kraft plans to add a 30MW solar PV power plant to the site in future as well. The announcement indicated the BESS would both optimise the output of the wind project (42.6MW, comprising seven Siemens Gamesa 6.6MW wind turbines) as well as provide ancillary services to Sweden's transmission system operator (TSO) Svenska kraftnät.

Where is the 10MW Bess project located?

The 10MW BESS will be strategically located in SE3, helping to stabilize the grid by providing ancillary and balancing services across frequency markets. "We are excited to deliver this project to our customer," said Magnus Häggström, Chief Commercial Officer at Helios Nordic Energy.
