

Switzerland exports energy storage

Overview

Switzerland exports much of its electricity production for essentially commercial reasons. In doing so, it benefits from the operational flexibility of its hydroelectric storage power plants (dams). How is energy used in Switzerland?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What is Switzerland's energy balance?

Switzerland's energy balance provides information on domestic production, import / export, storage, conversion, own consumption, transport and grid losses and consumption of the various energy carriers in Switzerland on an annual basis. Anpassung der Heizwerte von Petrolkoks, Steinkohle und Braunkohle in der Gesamtenergiestatistik. Faktenblatt.

What is the energy mix of Switzerland?

Includes a market overview and trade data. Switzerland's overall energy mix includes imported oil (51%) and natural gas (15%), and largely domestic electric power generation (33%), including hydropower and nuclear. Switzerland is nearly self-sufficient in electricity production and the country trades actively on the European energy grid.

What is Switzerland's energy consumption in 2021?

Switzerland's overall energy consumption in 2021 included petroleum products (43%), electric power (26%), natural gas (15%), and wood and coal (6%). Switzerland is nearly self-sufficient in electricity production. In 2021, more than 680 hydroelectric plants generated 61.5% of the electricity consumed in Switzerland.

Is Switzerland self-sufficient in electricity production?

Switzerland is nearly self-sufficient in electricity production. In 2021, more than 680 hydroelectric plants generated 61.5% of the electricity consumed in Switzerland. The country's four nuclear plants generated another 28.5% of the electricity consumed in Switzerland, but also exported approximately half of their total production.

How much oil does the United States export to Switzerland?

U.S. exports to Swizterland of refined petroleum grew steadily between 2014 and 2017 from \$4 million to \$29 million, while U.S. crude oil exports to Switzerland began in 2015 and have amounted to between \$16 million and \$139 million annually. Prepared by the International Trade Administration.
