

Taipei Energy Storage Power Station Enterprise

Overview

Why are stable energy storage solutions important in Taiwan?

As Taiwan's renewable energy share continues to grow, stable energy storage solutions are becoming increasingly vital to offset fluctuations in solar and wind power generation.

Does Taiwan have a potential for energy storage?

Although the application in renewable energy generation is not regulated so far, InfoLink believes that the renewable sector provides the biggest potential for energy storage in Taiwan, just like how the U.S. and China developed its energy storage industry.

What are Taiwan's energy storage development trends?

In 2020, Taiwan showed sign of energy storage development trends, with Taipower launching a procurement for energy storage AFC service under bilateral contracts, followed by tenders for projects located in Tainan, New Taipei City, and Kaohsiung.

Does Taiwan have a major energy consumer clause for BTM storage applications?

C&I sector for BTM storage applications is driven by the “major electricity consumer clause.” However, Taiwan does not provide a favorable condition for businesses to utilize energy storage for now. Other international regulations include RE 100 and ESG.

How safe is Taiwan's Power System?

With an eye on the safety and stability of Taiwan's power system, the Longtan system features multiple protective measures for energy-storage safety, including "gas detector," "isolating switch," and "clean fire-extinguishing agent," assuring rapid and effective handling of potential risks under any circumstances.

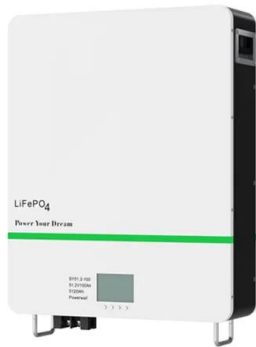

What is E-dreg energy storage facility?

Billion Watts Launches 64MW E-dReg Energy Storage Facility, Strengthening Taiwan's Grid Stability Strategically located within an industrial zone, the facility plays a crucial role in energy shifting and frequency regulation, participating in Taiwan Power Company's E-dReg ancillary services market.
