

The cost of energy storage and new energy equipment in El Salvador

Overview

How much does electricity cost in El Salvador?

El Salvador, June 2023: The price of electricity for households is USD 0.240 per kWh. The electricity price for businesses is USD 0.196 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes.

How much energy does El Salvador use per year?

El Salvador consumes six bn kWh of electric energy per year. Per capita, this is an average of 1,020 kWh. El Salvador can partly be self-sufficient with domestically produced energy, as the total production of all electric energy producing facilities is six bn kWh, which covers 92 percent of the country's own usage. The remaining needed energy is imported from foreign countries.

Is biomass a source of electricity in El Salvador?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. El Salvador: How much of the country's electricity comes from nuclear power?

Nuclear power - alongside renewables - is a low-carbon source of electricity.
