

The cost of laying photovoltaic panels on the factory roof

Overview

As of Q3 2024, the average cost of commercial solar panel installation was \$1.44 per watt DC, reflecting a 12% decline from the previous year, according to the Solar Energy Industries Association (SEIA). Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

How much do commercial solar panels cost?

The cost of commercial solar panels is typically measured in dollars per watt. In 2025, the average cost for commercial solar installations is approximately \$1.46 per watt DC. This reduction in cost is attributed to advancements in technology and increased market competition.

Can solar panels be installed on a warehouse roof?

Solar panels are also less susceptible to damage from wear and tear because they do not have any moving parts. As a result, you can expect little to no repairs. A typical warehouse or factory roof is the perfect landscape for a solar system. These roofs are usually large and flat with ample room for solar panel installation.

What factors affect a commercial solar panel cost?

Several factors affect the total commercial solar panel cost, including system size, panel efficiency, inverter technology, labor, permitting, and panel mounting requirements. Businesses should also consider available incentives and financing options to reduce upfront expenses.

How much does it cost to replace a solar inverter?

Inverters, which convert solar energy into usable electricity, generally need replacement every 10–15 years. Depending on the type and capacity, replacement costs range from \$5,000 to \$30,000, adding to the long-term commercial solar panel system cost.

What are the benefits of solar PV on warehouse roofs?

As energy efficiency rises to the top of the agenda for warehouse and logistics firms, more and more are seeing the benefits of solar PV. Installing solar PV on warehouse roofs means generating free electricity for the warehouse and adjacent buildings, such as offices.
