

# There is a communication base station inverter outside the house

# **Overview**

## Can inverters be installed outside?

As a rule, inverters designed for outdoor use may be installed either outdoors or indoors, however indoor inverters can only be installed indoors. The great majority of grid-tied or string inverters available today are designed for outdoor installation.

Where should an inverter be installed?

As mentioned above, your inverter will usually be installed near a sub board or main switch board. When the inverter is installed outside, they are not usually very visible form the roadside of properties. For homes, the inverter will most likely be in a garage, or along the side of the house near the meter box.

What are the characteristics of different communication methods of inverters?

The characteristics of different communication methods of inverters are obvious, and the application scenarios are different. In order to better weave the underlying network of energy digitization and intelligent development, choose the most appropriate communication method according to local conditions.

Why should you install an outdoor inverter?

Agricultural and Rural Settings: In agricultural or rural settings where outdoor space is abundant, outdoor installation offers a practical and cost-effective solution. Inverters can be mounted on poles, walls, or ground-mounted racks, optimizing space utilization and simplifying installation and maintenance.

How to choose a site for installing an inverter?

When choosing the site for installing an inverter, it is essential that the environmental conditions specified by the manufacturer be maintained. There are both temperature and humidity requirements for these devices.

# Where is the inverter located?

For homes, the inverter will most likely be in a garage, or along the side of the house near the meter box. For businesses, the inverters will also be near a sub board or main switch board. These are rarely located in areas where staff or clients will frequently be around.
