

Total investment in Norway s solar panel projects

Overview

Why are new solar installations gaining popularity in Norway?

Due to the high cost of electricity, there is currently a strong demand for new solar installations. Between January 2023 and early June 2023, Norway added 101 MW of new solar PV capacity, bringing the country's total installed solar PV capacity to 459 MW as of June 2023.

How many solar plants does Norway have?

Norway reached 597 MW of cumulative installed PV capacity spread across 28,170 solar plants at the end of December, according to new figures from the country's grid operator, Statnett, via its Elhub subsidiary. The country added about 300 MW of new PV installations in 2023. By comparison, it installed 152.7 MW in 2022 and 42.7 in 2021.

How much solar power will Norway produce in 2025?

"With a current solar PV capacity of 600 MW and a Compound Annual Growth Rate (CAGR) of 154%, the projected solar power production for 2025 is estimated to reach approximately 2.4 GW," he said. "The exponential growth underscores a promising trajectory, suggesting that Norway is poised to meet the envisioned solar capacity milestones.".

How does solar power work in Norway?

In Norway, the majority of distributed renewable power generation comes from rooftop solar power installed on residential and commercial buildings. Due to the high cost of electricity, there is currently a strong demand for new solar installations.

Will Norway have a solar power plant in 2022?

Norway's Norwegian Directorate of Water Resources and Energy (NVE) gave approval for its first solar power plant on December 5, 2022. Initially permitted on May 5, 2022, the Furuseth solar power plant will serve as a pilot for solar

power plants in Norway, providing valuable experience and knowledge about solar power.

When will Norway's first solar power plant be completed?

The total investment in the solar power plant is around NOK 40 million, and according to the plan, it will be completed during the autumn of 2022. For the Energy companies Østfold Energi and Akershus Energi, it is important to contribute to realize Norway's first solar power plant, and thus lead the way in investing in solar in Norway.
