

Transmittance Standard Version Solar Panel

Overview

Transmittance: Around 91-93% of sunlight passes through—enough to keep efficiency high. Weight: Adds about 10-15kg to a standard 60-cell panel, manageable for rooftop installations. Protection: Handles moderate impacts and weather conditions well.

Transmittance Standard Version Solar Panel

Understanding the Difference: Standard vs. High Transmittance ...

Standard transmittance EVA film is a generalpurpose material that provides well-balanced performance and meets the basic requirements of most solar modules. High transmittance ...
