

United Arab Emirates Base Station Energy Management System

Overview

Can battery energy storage system (BESS) technology be used in the UAE?

Trowers & Hamlins lawyer Shaun Hardiman discusses the potential of battery energy storage system (BESS) technology in the United Arab Emirates (UAE) and its ongoing and growing impact on the energy sector.

Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.

What is a Bess project in the UAE?

The UAE is focusing on renewable energy production, for example in its solar PV IPPs, across the Emirates. BESS projects have the potential to tie neatly into solar energy projects. For example, BESS projects can help to conserve energy generated during the day which can be used during 'down periods' at night.

How many MW of Bess are there in Abu Dhabi?

In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network. The batteries were supplied by NGK Insulators .
