

Uzbekistan s wind power storage requirements

Overview

Will Uzbekistan's 520 GW wind capacity satisfy 25 percent demand?

The projected wind capacity of 520 GW would satisfy 25 percent of Uzbekistan's demand for energy," said Martina Dabo of Intec-GOPA. The ambitious Uzbek wind pursuits, some experts say, also signal the country's cautious shift to new energy politics.

How much wind power can Uzbek erect?

Despite the recommendations, Uzbek officials believe the country can erect nearly 520,000 MW of installed wind power capacity at the areas with moderate wind conditions, slightly over 1,000 MW at the areas with good wind conditions and 765 MW in areas with perfect wind conditions. The.

Are Uzbekistan's wind power targets realistic?

Botir Khodjaev, the Central Asian country's deputy Economy minister, said the wind power targets are realistic since developing renewable energy resources is a matter of "necessity" due to Uzbekistan's primary fuel-energy resources composition.

How much gas does Uzbekistan use?

It currently uses 97 percent of its energy from Russian Gazprom oil and gas, 2.3 percent from coal and 0.7 percent from hydropower. Uzbekistan is wary of the Russian gas company Gazprom's attempt to change the Gazprom gas supplies dynamics in the region — from Uzbek gas mining fields to Kirgizstan.

Are Li-ion batteries a good investment in Uzbekistan?

Li-Ion batteries have seen in the last years a reduction in cost in the order of 25-30 %/year. Northwest part of Uzbekistan has high wind potential, whereas main load centres are in the South East. This requires HV or EHV OHTL to connect key wind centres with load centres.

Where can wind power be harnessed?

Based on the Germans' developed wind atlases, Uzbekenergo singled out two areas in the Navoi region and southern Karakalpakstan for wind capacity development to meet the rising demand for electricity. The German experts advise first start harnessing the wind potential in the Navoi and Karakalpakstan regions.
