

Vanuatu Substation Energy Storage Project

Overview

Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

Why is Vanuatu launching a solar farm?

The project underscores the Vanuatu government's commitment to decarbonising the electricity supply and aligning with international climate change goals. Notably, this solar farm represents the final direct-to-grid PV installation that can operate without an accompanying battery. Future projects will necessitate energy storage solutions.

What future projects require energy storage solutions?

Future projects will necessitate energy storage solutions. The upcoming Renewable Energy Solar and Storage on Efate and Tanna (RESSET) project, following this milestone, will provide an additional 5 MWp of PV generation, complete with a substantial stabilising and energy storage battery of 6.75MWh. Welcome to the discussion.

Vanuatu Substation Energy Storage Project

What are the energy storage projects in vanuatu

The first major utility-scale battery storage project was energised in 2017 - a 50MW/25MWh project in Pelham, developed and owned by Statera Energy. Going forward, deployment levels ...
