

West African Power Grid Communication Base Station Development

Overview

How does the West African Power Pool network work?

The loop also features 15 substations to distribute electricity and fiber optic cables to improve operations and public communication. This network not only enhances regional energy integration and cooperation, but it also completes the regional West African Power Pool grid with interconnections across 14 member countries.

Why should West Africa synchronize its power grids?

The synchronization of West Africa's national power grids marks a major leap in providing cleaner, more reliable electricity in a region historically challenged by unstable and costly power generation. A key benefit includes harnessing Guinea's abundant hydropower potential (approximately 6,000 MW), allowing its distribution throughout the region.

What is the West African Power Pool?

The West African Power Pool is a specialized agency of ECOWAS. It covers 14 of the 15 countries of the regional economic community (Benin, Côte d'Ivoire, Burkina Faso, Ghana, Gambia, Guinea, Guinea Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra. Recruitment of an individual consultant for the preparation, monitoring and.
