

## Western Europe Solar On-site Energy Communication Power Supply

#### **Overview**

Is solar power the most competitive source of electricity in Europe?

The cost of solar power decreased by 82% between 2010-2020, making it the most competitive source of electricity in many parts of the EU. In 2024, 46.9% of the electricity generated in the EU came from renewables and 22% of renewable electricity came from solar energy (Eurostat, March 2025). Source: SolarPower Europe.

Is solar a good source of energy in the EU?

Solar is the fastest growing energy source in the EU and is cheap, clean and flexible. The cost of solar power decreased by 82% between 2010-2020, making it the most competitive source of electricity in many parts of the EU.

What is the European Solar charter?

In the margins of the informal Energy Council meeting on 15 April 2024, energy ministers from 23 EU countries, industry representatives and Commissioner Kadri Simson, on behalf of the Commission, signed a European Solar Charter that sets out a series of voluntary actions to be taken to support the EU photovoltaic manufacturing sector.

What is the EU solar energy strategy?

As part of the REPowerEU plan, in May 2022 the Commission adopted an EU solar energy strategy, which identifies remaining barriers and challenges in the solar energy sector and outlines initiatives to overcome them and accelerate the deployment of solar technologies.

Why is Europe planning a ramp-up of solar-photovoltaic electricity?

Europe is planning a major ramp-up of solar-photovoltaic (PV)-based electricity to address its energy challenges, which include meeting its climate ambitions, managing a large part of its electrification, decarbonizing the electricity grid, and becoming less reliant on others.

How much solar power does the EU have in 2024?

The EU solar generation capacity keeps increasing and reached, according to SolarPower Europe, an estimated 338 GW in 2024. The EU has long been a front-runner in the roll-out of solar energy. Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy.
