

What are the energy storage procurement requirements

Overview

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase Agreements (PPAs), and term sheets. What is an energy procurement plan?

Under this Agreement, Seller is responsible for designing and administering an energy procurement plan to minimize the as-delivered cost of electricity, natural gas, and alternate fuels for Buyer, consistent with Buyer's reliability requirements and Seller's other obligations.

What is a battery energy storage system checklist?

Checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

Where can I find information on the energy storage program & projects evaluation RFP?

CPUC staff received comments on the RFI and updated the RFP for release. More information on the energy storage program and projects evaluation RFP can be access at Cal eprocure. The energy storage program and projects evaluation Bidders' Library can be accessed [here](#). The CPUC engaged Lumen Energy Strategy, LLC to conduct the study.

What did the energy storage rulemaking entail?

This rulemaking identified energy storage end uses and barriers to deployment, considered a variety of possible policies to encourage the cost-effective deployment of energy storage systems, including refinement of existing procurement methods to properly value energy storage systems. This rulemaking resulted in two CPUC Decisions, which are:

How many MW of energy storage will be built in SCE?

Resolution E-4937 approved SCE's energy storage solicitation to comply with SB 801. To date the CPUC has approved procurement of more than 1,533.52 MW of new storage capacity to be built in the State. Of this total 506 MW are operational.

What did the CPUC request for SCE's energy storage solicitation?

It also requested the CPUC to direct an electrical corporation serving the Los Angeles Basin to procure through a competitive solicitation a minimum of 20 MW. Resolution E-4937 approved SCE's energy storage solicitation to comply with SB 801.
