

# What are the functions of photovoltaic solar panels

#### **Overview**

At a high level, solar panels are made up of solar cells, which absorb sunlight. They use this sunlight to create direct current (DC) electricity through a process called "the photovoltaic effect."

#### What are the functions of photovoltaic solar panels

### Solar Panels 101: Understanding How They Work

Solar panels are devices designed to absorb sunlight and convert it into usable electricity. They are a cornerstone of solar energy systems and can be found on rooftops, in ...
