

# Where to connect the communication base station inverter

#### **Overview**

How do I connect my inverter to the Monitoring Platform?

Open SetApp and follow the on-screen instructions on your mobile device to connect to the inverter. In case the inverter is not connected to the monitoring platform via Ethernet or cellular, these instructions include setting up communications to the monitoring platform. 3.

How to connect and monitor the inverter and lithium ion batteries?

We highlighted below the correct way to connect and monitor the inverter and lithium ion batteries. A. USB cable connected to computer for WatchPower communication. B. RS232 cable connected to computer for WatchPower communication C. Remote panel communication cable to inverter D. BMS communication cable to Lithium-ion battery.

How do you connect a lithium battery to an inverter?

BMS Communication Link: Most lithium batteries come with a built-in BMS that can communicate with the inverter. Ensure that this link is properly established by connecting the BMS output to the corresponding input on the inverter.

How do I connect my battery bank to my inverter?

Set the DIP switches to master, grab a standard CAT5e cable, and connect the RS485 port on your battery to the BMS comms port on the inverter. Power up your system, navigate the settings to set your protocols (Battery – Lithium Ion), and voila, your battery bank is now in perfect harmony with your inverter.

How do I connect a battery pack to my inverter?

Connecting network cables: Connect each network cable to its corresponding network port. Use the port at the lower left for the first battery pack, the one at the lower right for the second battery pack, and the one at the upper for

the inverter. Configuring the battery pack: Remove the switch cover by pulling it up to expose the circuit board.

How do I connect a BMS battery to a Cat5e inverter?

Set your DIP switches to ID-64, power on the BMS through the battery's LCD screen, and navigate to protocol settings. Select "CAN protocol setting" and then "P06-LUX." With DIP switches set to "Master," connect your battery to the inverter using a standard CAT5e cable.

#### Where to connect the communication base station inverter

## FR-D800 Instruction Manual (Communication) (Standard model)

The Mitsubishi inverter protocol (computer link communication) enables parameter setting, monitoring, and so on through communication via the PU connector or the RS-485 terminals ...
