

# Which Dutch energy storage container is best

#### **Overview**

How much energy storage does the Netherlands need?

To achieve its renewable energy targets, reports in 2021 indicate that the Netherlands will need to install between 29 and 54 gigawatts (GW) of energy storage capacity by 2050. Storage with efficient management systems and digital controls is a crucial element of a reliable, flexible and affordable energy system.

Are energy storage systems safe?

Safety & health: For some specific energy storage systems, however, there are regulations or guidelines regarding safety and health. Electrical Vehicle (EV)-batteries -> EuroNCAP -> Series of crash, fire and safety tests to determine how safe electric vehicles and their batteries are.

Why do we need energy storage?

The growth of renewable energy generation in the Netherlands and across Europe has played a vital role in decarbonising energy production. The uptick in renewable energy adoption has also prompted the need for energy storage to help stabilise the power grid during moments of excess energy generated by these cleaner alternatives.
