

Which companies are involved in Mali s new energy base stations

Overview

The Syama Hybrid Power Station (: Centrale électrique hybride de Syama) is a planned 70 megawatts plant in . The power station is being developed by , a company that is based in , , United Kingdom, which supplies temporary power generation equipment. The off-taker is Syama Gold Mine, owned by , that is based in , Western Australia. The station has thermal, battery storage and solar energy co.

What is Albatros energy Mali?

Albatros Energy Mali S.A (AEM) independent private power project is a 90 megawatt (MW) heavy fuel oil power station built in Kayes, western Mali. It is Mali's first IPP to feed into the national grid. The power station consists of 6 Caterpillar diesel reciprocating engines. The project achieved financial close in June 2017.

How a decentralized energy supply works in Mali?

The small size and dispersed locations of villages in Mali for a long time made off-grid decentralized mechanical and electric energy supply the only viable option. A multifunctional platform consists of a 10-hp diesel engine that, as desired, can power a mill, a generator, a pump or other devices mounted on the same rail.

When did the Mali energy project close?

The project achieved financial close in June 2017. Construction commenced in July 2017, and was commissioned in October 31st 2018, ahead of schedule. It is providing a much needed sustainable energy source allowing an increased access to electricity for Mali's citizens and enabling industries to grow.

What is Mali's first IPP?

It is Mali's first IPP to feed into the national grid. The power station consists of 6 Caterpillar diesel reciprocating engines. The project achieved financial close in June 2017. Construction commenced in July 2017, and was commissioned in October 31st 2018, ahead of schedule.
