

Which lithium energy storage power supply is best in Chile

Overview

Is lithium a critical energy resource in Chile?

The global and regional significance of lithium as a critical energy resource is examined. The evolution of Chile's lithium industry is analyzed, emphasizing two recent key policy initiatives: the 2015 National Lithium Commission report and the newly launched national lithium strategy. The salient features of these initiatives are outlined.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Which Chilean centers are focusing on developing lithium technologies?

Another Chilean center focused on developing lithium technologies is the Advanced Mining Technology Center (AMTC), located at the University of Chile. Research has been focused on new sustainable technologies for lithium brine processing and direct LiOH production.

Is lithium a strategic energy material?

Lithium is a strategic energy material with significant potential for countries with abundant reserves, such as Argentina, Bolivia, and Chile, given its use in rechargeable batteries.

How much energy storage will Chile have in 2024?

During the Energy Storage Summit Latin America (ESS LatAm) in October 2024, Ana Lía Rojas, executive director at the Chilean renewable energy and energy storage association (ACERA), explained how the current levels of curtailment in Chile, which could end up at approximately 5TWh in 2024, could power up to 3.4GW of 4-hour duration energy storage.

Is lithium a mineral in Chile?

In essence, lithium has a unique status in Chile, similar to hydrocarbons. Under Chilean law, lithium is considered a strategic mineral belonging to the state of Chile, and exploration and operations can only be carried out under special operation contracts (CEOL). 3.2. Companies exploiting lithium in the Salar de Atacama
